

*“No one is born hating another person because of the color of their skin, or their origin, or their religion. People have to learn to hate, and if they can learn to hate, they can also be taught to love. Love comes more naturally to the human heart than its opposite”*

*“Education is the great engine of personal development. It is through education that the daughter of a farmer can become a doctor, the son of a miner can become the head of the mine, or the son of agricultural workers can become president of a great nation”*
